In the upper left corner of the next screen click on the MyPlaceForParts logo that the red arrow is pointing to.

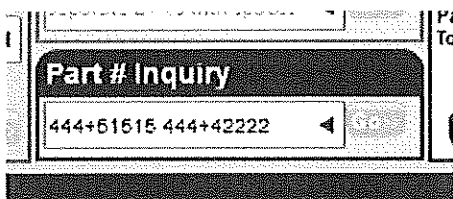

On the next screen you can search the “Part # Inquiry” box to look up individual or multiple part numbers.

Follow these instructions to look up individual parts. As an example our line code for WIX is 444, which is in the second column on our discount sheet. If you then entered 444+51515 it would return your pricing and information on WIX part number 51515.

For multiple part number separate each line code/part number by a space. As an example if you wanted pricing on a Wix 51515 and 42222 you would enter it like this.

The results would look like this.

The price under "Cost" is the States final cost after discount. The "List" price that is showing is a recommended selling price to a shop's customer that purchases parts from us. Our bid to the State is based off of "Dealer" which is lower than "List" price. All this applications displays is "List" price and "Cost", which is your final price off of "Dealer as per our quote. All State agencies will have access to this application to look up product and pricing and in most locations will be able to place their orders with their local Bumper to Bumper store through this lookup.

This application contains a lot of other benefits such as vehicle lookup by VIN number, the ability to list vehicles in fleets for quick lookup, and inventory stocking lists. Agencies will be able to look up parts by Year, Make, and Model as well as search for supplies and tools in the blue "Accessories Supplies Tools box. There is a detailed guide to features and benefits in the "Help" section.
